EDUCATION

Bachelor of Engineering in Computer Engineering

University Of Phayao | 2022 - 2026

Science-Mathematics-Computer Program

Nongphai School | 2019 - 2021

SKILLS

- **Programming Languages:** JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** React, Node.js, Tailwind CSS, Bootstrap
- **Tools:** Docker, Git, GitHub
- **AI for Dev:** Gemini, ChatGPT, DeepSeek, Perplexity, Claude, MS Copilot, Ollama
- **Design:** Figma, Canva

OTHER SKILLS

- Miro, Notion
- Python, Java, C, C++

About Me

A Computer Engineering New Grad focusing on Front-end Development (React, JS, Tailwind, Bootstrap). Experienced in bridging design and code via Figma. As an AI-Augmented Developer, I leverage AI to accelerate coding and debugging. I am a fast learner, eager to build upon existing skills and proactively master new technologies to deliver user-centric web applications.

EXPERIENCE

Internship Experience

System Engineer | AskMe Solutions & Consultants Co., Ltd.

- Designed user-friendly Grafana monitoring dashboards for real-time data visualization and system tracking.
- Developed automated workflows via n8n and API integrations, significantly reducing manual workloads.
- Configured cloud-based networks and tested system performance, strengthening knowledge of data flow essential for web optimization.

Project Experience

Online Store Web Application System For Grocery Shops

- Built a responsive Front-end using React, Tailwind CSS, and Bootstrap, ensuring a seamless cross-device user experience.
- Integrated Node.js/Express and Firebase Firestore for real-time NoSQL data sync, authentication, and order tracking.
- Deployed the application via Firebase Hosting for high-speed, reliable content delivery.
