EDUCATION

Bachelor of Engineering in Computer Engineering

University Of Phayao | 2022 - 2026

Science-Mathematics-Computer Program

Nongphai School | 2019 - 2021

SKILLS

- **Programming Languages:** JavaScript, HTML5, CSS3, Python, Java, C, C++
- **Frameworks & Libraries:** React, Node.js, Express.js, Tailwind CSS, Bootstrap
- **Database & Cloud:** Firebase (NoSQL), MySQL
- **DevOps & Tools:** Docker, Git, GitHub
- **AI for Dev:** Gemini, ChatGPT, DeepSeek, Perplexity, Claude, MS Copilot, Ollama

About Me

A motivated Computer Engineering graduate passionate about Software Development. Proficient in designing and building scalable applications using modern technologies like React, Node.js, and Docker. As an AI-augmented developer, I leverage AI tools to optimize code quality, streamline debugging, and deliver efficient solutions. I treat every technical challenge as an opportunity to learn and am driven to build robust software systems that add value to the organization.

EXPERIENCE

Internship Experience

System Engineer | AskMe Solutions & Consultants Co., Ltd.

- Designed and deployed monitoring dashboards using Grafana to visualize real-time performance data for servers and network systems.
- Configured and maintained network infrastructure (Switches, Access Points, Routers), gaining a strong understanding of how data flows within a system.
- Developed a solid foundation in system architecture and server environments, providing a crucial advantage for deploying and maintaining secure web applications.

Project Experience

Online Store Web Application System For Grocery Shops

- Developed an end-to-end e-commerce platform for grocery stores to streamline daily operations, including user account management, product catalogs, and real-time order tracking.
- Built a responsive Front-end using React.js, HTML, and CSS to deliver an intuitive and seamless user experience.
- Implemented a scalable Back-end using Node.js/Express.js and integrated Firebase Firestore for real-time NoSQL data synchronization.
- Containerized the application using Docker to ensure consistent development environments and streamline the deployment process.
- Leveraged AI tools (e.g., ChatGPT, Ciaude) during the development process to optimize code structure, accelerate debugging, and increase overall productivity.
