EDUCATION

Bachelor of Engineering in Computer Engineering

University Of Phayao | 2022 - 2026

Science-Mathematics-Computer Program

Nongphai School | 2019 - 2021

SKILLS

- **Front-end:** React, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS
- **Back-end:** Node.js, Express.js, Firebase(NoSQL), MySQL
- **DevOps & Tools:** Docker, Git, GitHub
- **AI for Dev:** Gemini, ChatGPT, DeepSeek, Perplexity, Claude, MS Copilot, Ollama

OTHER SKILLS

- Figma, Canva, Miro
- Python, Java, C, C++

About Me

A Computer Engineering graduate specializing in Fullstack Development. Proficient in building end-to-end web applications using React, Node.js, and Firebase. I am an AI-augmented developer, adept at leveraging AI tools to accelerate coding, debugging, and problem-solving. I treat every project as a hands-on learning experience and am always motivated to develop myself into a valuable technical asset for the organization.

EXPERIENCE

Internship Experience

System Engineer | AskMe Solutions & Consultants Co., Ltd.

- Designed and deployed monitoring dashboards using Grafana to visualize real-time performance data for servers and network systems.
- Configured and maintained network infrastructure (Switches, Access Points, Routers), gaining a strong understanding of how data flows within a system.
- Developed a solid foundation in system architecture and server environments, providing a crucial advantage for deploying and maintaining secure web applications.

Project Experience

Online Store Web Application System For Grocery Shops

- Developed an end-to-end e-commerce platform for grocery stores to streamline daily operations, including user account management, product catalogs, and real-time order tracking.
- Built a responsive Front-end using React.js, HTML, and CSS to deliver an intuitive and seamless user experience.
- Implemented a scalable Back-end using Node.js/Express.js and integrated Firebase Firestore for real-time NoSQL data synchronization.
- Containerized the application using Docker to ensure consistent development environments and streamline the deployment process.
- Leveraged AI tools (e.g., ChatGPT, Ciaude) during the development process to optimize code structure, accelerate debugging, and increase overall productivity.
